

GREENSPACES & ARBOTAG A PERFECT TEAM

TAG URBAN TREES EASILY AND IMPROVE
THE MANAGEMENT OF GREEN AREAS!

ADVANTAGES

Clear identification

ArboTag ensures a clear identification of all trees in an urban environment. Trees are easily recognized through the system when implementing monitoring and care activities. Tags are fast to apply with the use of a special hammer.

Easy management

The GreenSpaces platform allows to systematically register ArboTags during tree inventories and offers full control of your tree data at all times. The tag number ensures traceability of monitoring and maintenance activities on all trees.

Exclusive system

The patented ArboTag system is the only tree numbering system that grows with the trunk. GreenSpaces and ArboTag work in synergy, increasing the efficiency of green management.
