Who we are:

We're an established software company based in the NOI TechPark, South Tyrol, Bolzano, Italy. We develop Web-GIS and mobile applications to manage geospatial data and provide innovative tools for the smart cities of the future.

Your Tasks:

We are looking for an analytical, results-driven back-end developer who will work with team members to troubleshoot and improve current back-end applications and processes.

Your Primary Roles:
- Specify and implement APIs and other I/O interfaces for data queuing, database storage, and application-to-application data exchange
- Communicate and work closely with management and CTO to schedule delivery of feature sets, estimate task timeframes, and follow agile iteration processes
- Document code and maintain applications as a new functionality is developed and new deployments and revisions rolled out.
- Research and evaluate new technologies to be used as enhancements or upgrades to existing server clusters, computing applications and other IT infrastructure components
- The opening is a full-time position.

Your Education/Experience:
- Degree in Computer Science or equivalent experience
- Hands on experience with modern PHP and Symfony
- 3+ years building web applications / web services
- Ability to effectively and independently own areas of development and contribute to development deliverables as part of a team
- Good knowledge of SQL language
- Good analytic skills and problem-solving oriented attitude
- English language proficiency

Nice To Have:
- Experience PostgreSQL databases
- Experience with Geographic Information Systems and geodata
- Knowledge of software versioning tools
- Fluency in Italian and/or German

What Will Make You Stand Out:
- Good communication and relationship building skills
- Curious, adaptable personality who enjoys a dynamic and constantly evolving environment
- Team working and problem solving
- Analytical skills and aptitude for innovation

What We Offer:
- Work in a young, positive, multilingual and multicultural team of experienced professionals
- Smart working environment with flexible work time
- Opportunities to shape a growing company and participate to its success
- Opportunity to develop your strengths with us
- Participation in innovative projects on topics related to climate change and environment
